15-25-35 Year Warranties

Multiple Warranties with A "*Rainbow of Colors*".

Cedar Valley Shingle Systems Backed by New Multi-tier warranties.

Cedar Valley Shingle Systems has been the leader in the shingle panel industry for over 20 years. We've built our reputation on quality, service and flexibility. Now you can choose a warranty with those same advantages. Cedar Valley Multi-tier warranties offer three levels of coverage based on how the panels are finished.

15-year Standard Panel Warranty

Standard Cedar Valley Shingle Systems panels carry a 15-year Limited Liability Warranty. This warranty covers defects in manufacturing to the extent that any panel deemed to be defective will be repaired or replaced. The replacement of defective material as provided above shall constitute the sole and exclusive remedy of the buyer and shall fulfill all of seller's liabilities under this warranty.

25-year Factory Finished Panel Warranty

When Cedar Valley shingle panels are prefinished in the factory with one coat of a solid body stain, they carry a multi-tier warranty. The coating carries a limited 5-year warranty while the panel caries a longer 25-year limited liability warranty. These factory finished panels are prestained by a network of authorized machine stainers and are available nationwide in a "*Rainbow of Colors*". Ask your Cedar Valley sales representative for a color palette that shows the range available.

35-year Factory Finished Panel Warranty

When low maintenance means as much as a natural siding choice then the Cedar Valley Factory Finished machine staining process is for you. Using the Two-Coat factory finish process, Cedar Valley panels are prestained with an oil based primer and then an acrylic stain top coat to give them an extremely durable and long lived coating. This system carries a 15+15 coating warranty along with a 35-year panel warranty. Available nationwide in a "*Rainbow of Colors*", this system is recommended for projects where low maintenance is desired by the owner.
